Date: September 08, 2022

Course/Year/Section: BSIT 4D

Professor: Mary Rose C. Columbres

What is Python?

Python is the world's fastest growing and most popular programming language, not just amongst software engineers, but also amongst mathematicians, data analysts, scientists, accountants, networking engineers, and even kids, because it's very beginner friendly programming language. Python is a multi-purpose language. Python can solve complex problems in less time with fewer lines of code.

Why Python is so popular?

High-level language don't have to worry about complex task.

Cross-platform you can build run python application on windows, Mac, and Linux

Huge Community there's someone out there to help.

Large Ecosystem of libraries, frameworks and tools.
